

"Teaching Others To Save Lives"

## **UPCOMING NAEMT COURSE**

### **TECC Class: TECC 19-01**

NAEMT's Tactical Emergency Casualty Care (TECC) teaches EMS practitioners and other prehospital providers how to respond to and care for patients in a civilian tactical environment. It is designed to decrease preventable deaths in a tactical situation. The course presents the three phases of tactical care:

- Direct Threat Care that is rendered while under attack or in adverse conditions.
- Indirect Threat Care that is rendered while the threat has been suppressed but may resurface at any point.
- Evacuation Care that is rendered while the casualty is being evacuated from the incident site.

The 16-hour classroom course covers the following topics:

- Hemorrhage control;
- Surgical airway control and needle decompression;
- Strategies for treating wounded responders in threatening environments;
- Caring for pediatric patients; and
- Techniques for dragging and carrying victims to safety.

NAEMT's TECC course is Endorsed by the American College of Surgeons, meets the guidelines established by the **Committee on TECC** and the updated **National Tactical Emergency Medical Support Competency Domains**. This course is accredited by CAPCE and recognized by NREMT.

**Tuesday and Thursday Nights 6:00 PM to 10:00 PM**

**Saturday 8am – 4pm**

**January 15, 2019 – January 19, 2019**
